kids in the kitchen

Cooking with kids is a great way to teach the basics of good nutrition and encourage healthy eating habits that last a lifetime. In fact, studies show that children are more likely to try new foods when they are involved in prepping them. Cooking can also give kids an early foundation in science, math, language, and even reading.

Involving kids with age-appropriate tasks in the kitchen is both an important learning experience and a fun activity. Here are a few simple recipes made with simple ingredients and not a lot of sugar that kids can have a hand in prepping.
